DR.DROP

*Because we know you want the best
for your humans. Just as we want for you.*

Let's stay safe together on this journey and beyond.

Manufactured in a sleek contemporary design by AllInox Innovation company, Dr. Drop is distinguished by its cutting edge appearance and functionality.

Projected for heavy duty intense use, this appealing foot-pedal dispenser is entirely made of medical stainless steel, robust and durable, weather resistant and fully mechanical.

With Dr. Drop you offer your dear ones - partners, friends or customers - a way to live their lives fully, without reserve. Compared to conventional dispensers, Dr. Drop comes with the advantage of being visible due to its dimensions and the possibility of being placed at any entrance, right on the way of passers, so before touching any door handle. Up to 3500 users can benefit from one single 3.5L tank refill. In addition, this sanitizing stand is foot-pedal activated, therefore the risk of cross contamination is non-existent. It is hand contactless.

No Hand contact

Operated by the pedal, you do not have to touch with your hand to operate.

Vandal Proof

Entirely built from stainless steel; its shape and concept offer high protection against vandalism.

Anti-theft screws

Can be bolted with screws to the floor without the risk of it being stolen.

Lifetime Warranty

Being a weather and time resistant dispenser, it also comes with a lifetime warranty

Quiet and sealed

The components are manufactured with high accuracy and noise from its operation is very low.

Fully mechanical

As it works entirely mechanically, it does not require electrical outlet or batteries.

3.5 Liters tank

Up to 3500 uses with one single refill

Easy to maintain

Despite its sophisticated appearance, it does not require a special kind of maintenance

Made in EU

The whole product is entirely manufactured from highest quality materials with great care in Europe

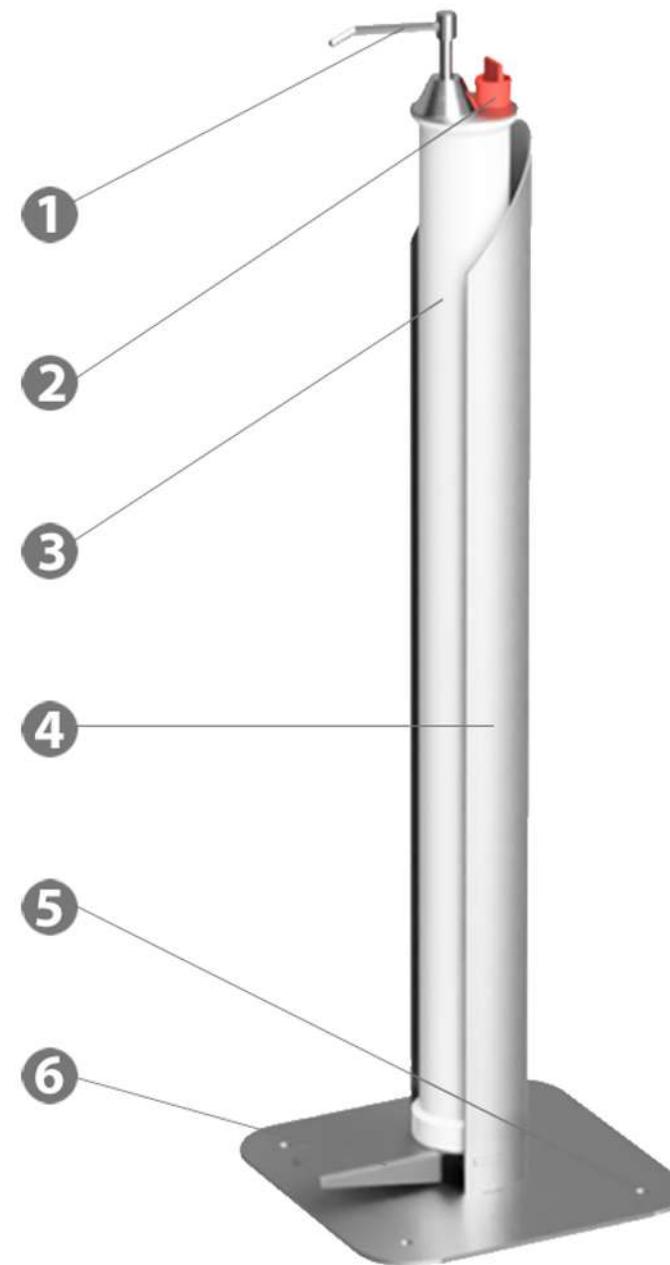

High-end protection in a polished design made for lifetime

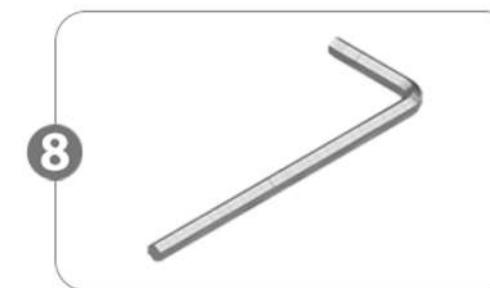

Hand hygiene is not a seasonal or a temporary endeavor. It is a lifelong protocol that we have to care about. Given the times we're living in and the massive change that has been produced in our lifestyle through the global medical recommendations and warnings, the absolute carefulness for sanitizing hands is an irreversibly lasting process. That's why we have built a lifetime guarantee product that does not require electricity or batteries, nor hand contact. It is fully mechanical, being operated by pushing the pedal with the foot, so without any risk of cross contamination. Imagine Dr. Drop as an exquisite technology ready to meet the ultimate requirements.
